DIGITAL SKILLS

Social Media / Quick Learning / Junior programmer in several languages / Creative person / Patient / Soft ware testing / Love to learn / Love reading / Organizational and planning skills / Good listener and communicator / Team-work oriented / Motivated / Internet user

ORGANISATIONAL SKILLS

Head of volunteers team

At the first conference (CryptoGames) I attended, the organizers named me as the head of the volunteer team, despite the fact that I went there as an ordinary volunteer.

COMMUNICATION AND INTERPERSONAL SKILLS

Unity is power

I always liked and managed to find a common language with people, despite the fact that I study a technical profile, I am comprehensively developed, I find a common language with most of the interlocutors.

I do not believe that one person can achieve anything and therefore I always strive for teamwork - this is the only way I can realize myself and help others with self-realization.

I am a team player, and letters of recommendation from conferences confirm this. I love helping people)

RECOMMENDATIONS

Volunteer
Name: Artem Lapikura
Phone number: (+380) 993072873
Email: puzzak69@gmail.com

Acknowledgments for effective work, quick response and great interest in video games at the Games Gathering 2019 conference

Letter of recommendation, where documented that I was a volunteer at the international Crypto Games Conference from October 10 to 11, 2019.

My duties as a volunteer were to control the observance of order and cleanliness in my area, help visitors, to communicate with volunteers and with the crew of the conference.

During the conference, I proved myself to be a punctual, conscientious, professional employee and leader of the volunteer team.

HOBBIES AND INTERESTS

Reading

I have read a lot of books, and this is my reason for pride. Thus, I have developed my speaking skills and have an excellent vocabulary. And also because of the same - poor eyesight.

Photography

I manage to take pictures, besides, I really like it, I understand it and, in general, "this is mine". I do not travel much and improve my skills in everyday subjects and use the simplest equipment most often.

Learning new

I never stand still, I constantly pose challenges and reach new heights, my whole life is development. I lead a fairly active lifestyle, I often study my hometown like no one else, I develop in my own way what I like. I want to find a job that will allow me to develop together with the team and always be on the crest of the wave!

PROJECTS

Telegram Bot's PHP framework

[Current]

I am creating a framework for easy creation of bots for Telegram using the PHP programming language - its main advantage is speed and lightness, with ease of use.

https://github.com/Puzzak/Telegram-php-bot

PUBLICATIONS

IoT solution for monitoring everything, using Telegram.

[2019]
https://blog.seeedstudio.com/blog/2019/09/23/step-by-step-tutorial-a-simple-iot-solution-to-collect-your-environmental-data/

In this day and age, there are so many surveillance systems out there in the market that can help you track your environment no matter where you are. Their main problem, however, is usually the price. After all, equipments that have functions such as Internet access, making calls and tracking various parameters of the surroundings are very complicated.

But what if someone tells that even a student can create such a system and make it work? Surely many would find it a joke. But in this article I showed that it is much easier than you think it is.
